END GATE LIME SOWER.

(PEORIA)

Bear in mind that the PEORIA END GATE LIME SOWER distributes evenly for 18 feet, lime, either dry or damp. It also spreads marl and fertilizer. And with a slight extra cost an attachment to sow oats.

Capacity for lime—600 pounds to 10,000 pounds per acre.

Outlasts any competitor because of greater strength and simplicity of construction.

THE BROWN DISC HARROW

Is made of Angle Bar Steel, which is tougher and better than Flat Steel. This is the highest type in Disc Harrows.

THE STUDEBAKER WAGON

Civilization has advanced on the wheels of a Studebaker Wagon. The slope shouldered spoke, the toughened hub and careful construction have made the name "Studebaker" stand for something.

Peoria Harrow, Alfalfa and Grass Seeder A Force Feed Clover and Grass Seeder

Sows as accurately as the best type of two horse drill. No extra team or man to operate. You sow seed and cover immediately with the harrow. Same amount of seed will sow at least one-third more ground. All seed covered same depth, and each plant has same start to grow. Sow after freezing time is over, thereby insuring germination without danger.

THE BROWN SMOOTHING HARROW

Has been called by many
“The Unbreakable Harrow.”

It is very strong, fitted with a “Relief Spring” which helps it over obstructions. Has an L shaped tooth bar and a U shaped bolt. It is made of high Carbon Steel and the best Malleables.

SIZES—50—60 and 75 Teeth.
